

Tenure-Track Assistant Professorship in

Molecular Biology

The **Max Perutz Labs** are looking for a tenure track junior group leader with outstanding potential to establish an independent and internationally competitive research group in the field of Molecular Biology. The **mission** of the Max Perutz Labs (<https://maxperutzlabs.ac.at>) is to **analyze and reconstitute complex biological processes from atomic to tissue and organismal scales**.

A successful candidate would ask fundamental, mechanistic questions related to the structure, function and/or dynamics of molecular complexes, organelles, and cells and/or multicellular processes, and will bring ambition and creativity to tackle biological questions that have the potential to impact human health. Candidates who also demonstrate a commitment to teaching and mentoring a diverse student body will be of particular interest.

We offer:

The successful candidate will be offered an **Assistant Professor** position for a maximum duration of six years and will join our vibrant, collaborative, and supportive research community. Should the candidate meet the conditions defined in the qualification agreement, she/he will be **promoted to tenured Associate Professor** at the Medical University of Vienna. Conditions and criteria are defined in the official career track guidelines of the university (Career scheme for the scientific University staff according to §99 Abs. 5 University Act 2002 “New qualification agreement” -

<https://www.meduniwien.ac.at/web/karriere/karriereentwicklung-an-der-meduni-wien/>) and <https://www.meduniwien.ac.at/web/karriere/offene-stellen/>

The gross salary for this position is based on the collective agreement for university employees (§49, A2) and may be adjusted depending on previous work experience.

The **Max Perutz Labs** are located at the **Vienna BioCenter (VBC)**, a leading center for life science research in Europe. The campus is home to 1400 scientists from more than 40 nations with English as the working language. In addition to excellent core facilities (<https://www.viennabiocenter.org/vbcf/>) and a competitive international PhD program (<https://training.vbc.ac.at/phd-program/>), the campus offers on-site childcare and the city of Vienna has regularly topped international indices for its quality of life.

We aim to increase the proportion of women in leadership positions and therefore encourage qualified female candidates to apply. In case of equivalent qualifications, preference will be given to female applicants.

Your profile:

- Completed scientific or medical education with PhD or equivalent degree.
- International recognition in the respective research area.
- Successful and continuous acquisition of peer-reviewed third-party funding.
- Educational and didactic qualifications including supervision of Masters and PhD students.
- Diversity and gender competence.
- International working experience

Application documents:

Please submit your application in English to faculty-recruiting5@meduniwien.ac.at by **January 16th, 2023** at the latest. All files should be merged into a single PDF. Questions may be addressed to the Scientific Director of the Max Perutz Labs - Prof. Alwin Köhler (alwin.koehler@maxperutzlabs.ac.at).

Applications should include:

- curriculum vitae
- list of publications
- list of five key publications with the possibility of downloading
- summary of research and teaching activities
- a concept of future research plans
- three letters of reference

Applicants are also requested to complete the Fact Sheet of the Medical University of Vienna (see link) and to attach it to their application (https://www.meduniwien.ac.at/Factsheet_Professuren_99_5_UG).

Information in accordance with the General Data Protection Regulation can be found at https://www.meduniwien.ac.at/Datenschutz_Professuren/

About the Max Perutz Labs

The Max Perutz Labs are a research institute established by the University of Vienna and the Medical University of Vienna to provide an environment for excellent, internationally recognized research and education in the field of Molecular Biology. Dedicated to a mechanistic understanding of fundamental biomedical processes, scientists at the Max Perutz Labs aim to link breakthroughs in basic research to advances in human health.
