

Slade Lab

# Part-time technician

## About the lab

We are a team of molecular biologists studying transcription regulation in human cells using biochemistry, molecular cell biology and functional genomics techniques. Our ongoing work focuses on the regulation of transcription and mRNA stability by SPOC domain proteins and their relevance for neuronal differentiation and neuronal disorders.

## About the position

The position is available **from January 2, 2026 until April 30, 2027 with the possibility of extension**. The contract is for **20 h/week** with the salary of 1.349 brutto (14x per year).

## Candidates

Successful candidates should

- Hold a BSc or MSc degree in Biology, Biotechnology or Biomedical Sciences;
- Have experience in cell culture and molecular biology techniques (e.g., cloning, RT-qPCR, western blotting);
- Experience with microscopy, flow cytometry, and protein purification is advantageous.

We are looking for a team player with willingness to acquire new skills, collaborate and support various projects. Excellent organizational and communication skills are essential, as well as a good command of the English language.

## Application

- CV
- Motivation letter
- Grade transcripts
- Contact information for at least one reference
- Indicate **Kennzahl: 666/25**
- Send to: [dea.slade@meduniwien.ac.at](mailto:dea.slade@meduniwien.ac.at) and [bewerbungen@meduniwien.ac.at](mailto:bewerbungen@meduniwien.ac.at)
- **Deadline: October 15, 2025**
