FACS Facility

Technical Assistant position at Max Perutz Labs (f/m/d) - 20 Hours

Introduction

Join our team at the FACS Facility and work at the forefront of flow cytometry and cell sorting. We provide access to cutting-edge technologies and expert scientific support for researchers across Max Perutz Labs, academic institutions, and biotech companies. From experimental design and sample preparation to advanced cell sorting, data acquisition, and analysis, we work closely with our users to turn challenging biological questions into robust and innovative experimental solutions.

About the position / the research project

As part of our team, you will contribute to a dynamic, technology-driven environment where state-of-the-art approaches and scientific expertise come together to enable impactful research.

Your tasks will include:

- Operation and monitoring of the sorters and analytical machines
- Practical guidance and instructions to students & post-docs on flow cytometers
- Implementation of user training sessions
- Assistance in maintaining FACS equipment
- Thoroughly document procedures and communicate results to users
- Contribute to laboratory organization and management to ensure seamless workflows (ordering, reagent preparation, equipment functionality)

Candidates

Your qualifications

- Relevant high school diploma (e.g. HTL Rosensteingasse) or equivalent (e.g., bachelor's degree in life sciences or related fields with significant laboratory experience
- Experience in flow cytometry
- Knowledge of acquisition and data analysis software is a plus
- Solid understanding of basic biology and a strong technical interest in instrumentation
- Strong communication skills with a very good command of English (both oral and written)
- Proactive and self-organized workstyle
- High accuracy and reliability

About the Max Perutz Labs

The Max Perutz Labs are a research institute established by the University of Vienna and the Medical University of Vienna to provide an environment for excellent, internationally recognized research and education in the field of Molecular Biology. Dedicated to a mechanistic understanding of fundamental biomedical processes, scientists at the Max Perutz Labs aim to link breakthroughs in basic research to advances in human health. The Max Perutz Labs are located at the Vienna BioCenter, one of Europe's hotspots for Life Sciences, and host around 40 research groups, involving approximately 450 scientists and staff from more than 50 nations.
