Mission Statement
The Max Perutz Labs are dedicated to a mechanistic understanding of fundamental biomedical processes. By analyzing and reconstituting complex biological systems across different scales, our scientists aim to link breakthroughs in basic research to advances in human health.

Joint Venture
The Max Perutz Labs are a joint venture between the University of Vienna and the Medical University of Vienna that builds on the unique opportunities that arise from being embedded in the Vienna BioCenter Campus while having one of the largest hospitals in Europe, the Vienna General Hospital, on our doorstep.

In visualizing haemoglobin, Max Perutz paved the way towards the era of precision medicine. To realize its full potential, precision medicine necessitates a molecular mechanistic approach.
The Max Perutz Labs are part of the Vienna BioCenter, one of Europe’s hotspots for life sciences.

Female and Male staff: 55/45

Research Groups and their relation to Research Areas:
- 47 Research Groups
- 4 Research Areas
  - Mechanistic Cell and Developmental Biology
  - Chromatin, RNA and Chromosome Biology
  - Infection and Immunity
  - Structural and Computational Biology

Founding:
The Max Perutz Labs were founded in 2005 as a joint venture of the University of Vienna and the Medical University of Vienna.

50+ Nationalities

50+ Group Leaders and Lecturers

128 Administrative staff and science support

52 Post Docs

400 Scientists & Staff

123 PhD Students

50 Undergraduates

Part of the Vienna BioCenter
